

PRODUCT LIFE CYCLE BULLETIN

01 July 2016

Subject: End of Sale Notice - Blackhawk PCI560 JTAG Emulator

1. Blackhawk announces its intent to discontinue the Blackhawk PCI560 JTAG Emulator (PCI560) product model. The End of Sale date for this model is scheduled for 01 January 2017 or when inventory is depleted. The PCI560 product is not being replaced with another PCI-based solution. See recommendations below for more information.

2. Definitions.

- End of Sale (EOS). The last date to order the product. The product is no longer for sale.
- End of Life (EOL). The last date that Blackhawk will provide support to the product(s) listed below. The EOL date is twelve (12) months from the EOS date. Emergency recovery and/or upgrades may be performed in accordance with customer specific service plans or upgrade agreements as negotiated prior to EOS.
- End of Life (EOL) Cycle. A process that guides the final business operations associated with the product life cycle. The end-of-life process consists of a series of technical and business milestones and activities that, once completed, make a product obsolete. Once obsolete, the product is not sold, manufactured, improved, repaired, maintained, or supported.
- Software Maintenance Contract Support. The time period that Blackhawk may release any software maintenance releases or bug fixes to the software product. Software maintenance support will terminate on the End of Life date. After this date, Blackhawk will no longer develop, repair, maintain, or test the product software.

3. Product Information: Blackhawk PCI560 JTAG Emulator

4. Impacted Software Releases: N/A

5. Impacted Software Part Numbers: N/A

6. Impacted Hardware Part Numbers:

- BH-PCI-560
- 12102
- 12102B
- 12102D
- 12102N

7. Replacement Part Numbers:

- None

8. Analysis:

- End of Sale Date: 01 January 2017
- End of Life: 01 January 2018
- Software Maintenance Support Contract: N/A
- Last Supported Software Version: N/A
- Affected Market / Regions: Global

9. Recommendations.

- While the PCI560 is not being replaced by another PCI-based solution, we would recommend a USB-based product moving forward. If a USB-based solution is feasible, the Blackhawk USB560v2 STM Emulator is a newer model offered at less expensive price point. The USB560v2 does requires CCS v4.2 or later. For a full description of features of the USB560v2 product please refer to <http://www.blackhawk-dsp.com/products/USB560v2.aspx>.

10. Required Actions.

- Specific Actions Required By Customer - Customers should be aware of the End of Life scheduled for 01 January 2018 and act accordingly.

11. Attachments. There are no attachments for this bulletin.

12. Additional Information.
